Project brief

Page marker: A1

This document has two digitally generated text pages.

Merge this file before appendix.pdf.

Expected merged order: A1, A2, B1.

The next instruction removes physical page 2.

After removal, the result should contain A1 and B1.

Undo must restore the previous three-page result.

LOCAL NETWORK TEST CANARY:

ATTENLO_LOCAL_ONLY_CANARY_A1_7C82

Synthetic content. No customer data. Do not upload document contents.

Working notes

Page marker: A2

This is the second page of the brief.

This page is intentionally removed in the follow-up test.

Do not delete or overwrite either original input file.

A successful output must reopen in an independent reader.

File sizes must come from actual bytes, not generated prose.

Appendix

Page marker: B1

This is the one-page appendix.

It follows both pages of brief.pdf in the merge test.

It remains after removing physical page 2.

The sample can be used without a customer document.

This file is small and is not a compression benchmark.
